Data analysis process

Read the problem statement

Ask Data Driven Questions

Data Inspection

Data Collection

Data collected from the shop as people transact. Collected via P.O.S system

Data is stored in the shop database

Data Ingestion

Data is moved from the shop database to the data warehouse using ETL pipeline

Data warehouse in Databricks

Data Processing

This happens in Data bricks. We use SQL to process data.

Data Analysis

We exact the data from our DMS(data Bricks) to excel for analysis.

We create graphs and tables and charts on excel.

Data Presentation

Explain the findings from the data with a presentation in canva or powerpoint.

Data Monitoring

Dashboard is created in Power BI and Data Studio to continuously monitor the sales.
